***Dr. Nori Dattatreyaudu***

Dr. Nori Dattatreyaudu is a globally recognized eminent scientist and oncologist. He has made significant contributions to the fight against cancer. He was the first physician, as early as 1979, in the United States of America to explore a computerized brachytherapy system. He has developed and popularized the transperineal brachytherapy technique, a non-surgical approach for radioactive seed implantation for cancer treatment, which improved the quality of life of patients.

The American Cancer Society (ACS) has bestowed the honor of "Tribute to Life" on Dr. Nori Dattatreyaudu in recognition of his contributions to cancer research, patient care, treatment, and education. He was awarded Padma Shri in 2015 for his outstanding contributions to the field of medicine.

Dr. Nori Dattatreyaudu was born in a Telugu family in Mantada village, Krishna district of Andhra Pradesh, India. He did his schooling at Machilipatnam. He obtained his medical degree from Kurnool Medical College and a Postgraduate degree from Osmania Medical College.

Dr. Nori is a Professor and Executive Vice Chairman of the Radiation Oncology Department at The New York–Presbyterian Hospital / Weill Cornell Medical College in New York City. In addition, Dr. Nori is the Chairman of the Radiation Oncology Unit at the New York Hospital Medical Center of Queens.
